RR21 Light grey
NCS 2502-B
PVDF / Polyester

RR23 Dark grey
≈NCS 7502-B
PVDF

RR40 Silver
PVDF

RR41 Dark silver
PVDF

RAL colour codes: Given RAL colours may have minor deviations from RR/R colours due to the high grade weather resistant pigmentation systems.

NCS colour codes: The NCS codes corresponding to the RR/R colours indicate the nearest colour in the NCS colour chart.

Panel System
2.10 INT
December 2007

Colour variation

Small colour variations may for coating technical reasons appear between different delivery batches of the panel coating material. If a specific installation order has not been informed panels should be installed in delivery order. The guideline value for an acceptable colour variation compared to the original colour sample is $E \leq 1$ (ISO 7724). The final colour acceptance is, however, to be visually made in various lighting conditions, where the product is not allowed to essentially deviate from the colour sample. The colour sample used for comparison will be an original sample agreed on jointly between the buyer, seller and the steel sheet supplier.

Väripoikkeamat

Pinnoitusteknisistä syistä voi pintapellin eri toimituserien välillä ilmetä pieniä värieroja. Jos elementeille ei ole ilmoitettu tiettyä asennusjärjestystä, elementit on asennettava toimitusjärjestyksessä. Ohjearvo hyväksyttävälle väripoikkeamalle verrattuna alkuperäiseen värinäytteeseen on $E \leq 1$ menetelmän ECCA T-3 mukaisesti. Lopullinen hyväksyntä tehdään kuitenkin eri valaistusolosuhteissa, joissa tuote ei saa olennaisesti poiketa värimallista. Vertailussa käytettävät värimallit sovitaan yhdessä ostajan, myyjän ja teräslevyn toimittajan kanssa.

Farbtonunterschiede

Kleinere Farbtonunterschiede können aus beschichtungstechnischen Gründen in verschiedenen Anlieferungen des Beschichtungsmaterials vorkommen. Wenn keine besondere Montage-reihenfolge vereinbart wurde, sind die Paneele in der Reihenfolge der Lieferungen zu montieren. Der Wert für die akzeptable Farbtonabweichung vom ursprünglichen Farbtonmuster beträgt $E \leq 1$ (ISO 7724). Die endgültige Farbtongenehmigung ist unter verschiedenen Lichtverhältnissen visuell vorzunehmen, wobei das Paneel vom Farbtonmuster nicht nennenswert abweichen soll. Das Farbtonmuster soll in diesem Fall ein vom Kunden, Verkäufer und Blechlieferant zusammen vereinbartes Originalmuster sein.

CERTIFIED QUALITY

Paroc Panel System conforms to ISO 9001 Quality Standard. This means that the full chain from raw materials, through production and deliveries operates according to the standard resulting in certified and constantly high quality.

The information in this brochure represents the sole and comprehensive description of the condition of the product and its technical properties. However, the content of this brochure does not mean granting a commercial guarantee. In so far as the product is used in an area of use which is not provided for in this brochure, we cannot warrant its suitability for said area of use unless the suitability was expressly confirmed by us upon request. This brochure replaces all previous brochures. As a result of constant further development of our products we reserve the right to make alterations to brochures.
