

## DECLARATION OF PERFORMANCE

No. 40423

| Unique identification code of the product-type | PAROC Marine Slab 150                                    |  |
|------------------------------------------------|----------------------------------------------------------|--|
| Intended use/es                                |                                                          |  |
| Manufacturer                                   | Paroc Group, Energiakuja 3, FI-00180 Helsinki            |  |
| System/s of AVCP                               | AVCP 1 for Reaction to fire, AVCP 3 for other properties |  |
| Harmonised standard                            | EN 14303:2009+A1:2013                                    |  |
| Notified body/ies                              | No. 0809 - Eurofins Expert Services Ltd                  |  |

The performance of the product identified above is in conformity with the set of declared performance/s. This declaration of performance is issued, in accordance with Regulation (EU) No 305/2011, under the sole responsibility of the manufacturer identified above.

Signed for and on behalf of the manufacturer by: Helsinki 28.9.2020

Paroc Oy Ab, Technical Insulation Tommi Siitonen, Segment Manager

## **Declared Performance/s**

| DURABILITY OF FIRE AND THERMAL PROPERTIES                      |                                                                                                                                                                                                                                                          |  |
|----------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Durability of Reaction to Fire Against Ageing/Degradation      | No change in reaction to fire properties for mineral wool products. The fire performance of mineral wool does not deteriorate with time. The Euroclass classification of the product is related to the organic content, which cannot increase with time. |  |
| Durability of Reaction to Fire Against High Temperature        | The fire performance of mineral wool does not deteriorate with high temperature. The Euroclass<br>classification of the product is related to the organic content, which remains constant or decreases<br>with high temperature.                         |  |
| Durability of Thermal Resistance Against<br>Ageing/Degradation | Thermal conductivity of mineral wool products does not change with time, experience has shown the fibre structure to be stable and the porosity contains no other gases than atmospheric air.                                                            |  |

## **Declared Performance/s**

| PROPERTY                                      | VALUE      | ACCORDING TO |  |  |
|-----------------------------------------------|------------|--------------|--|--|
| THERMAL RESISTANCE                            |            |              |  |  |
| Thermal Conductivity in 10 °C, $\lambda_{10}$ | 0,039 W/mK |              |  |  |
