

PRODUCT DATASHEET

PAROC Pro Section 100 G7

Stone wool pipe section with a white glass fibre cloth with aluminum facing.

Fire and thermal insulation for pipes and ducts on ships.

Maximum service temperature for PAROC Pro Section 100 G7 is 250°C. Surface temperature of the facing must not exceed 80°C (temperature restriction determined in accordance with heat resistance adhesive).

PAROC stone wool products are capable of withstanding high temperatures. The binder starts to evaporate when its temperature exceeds approximately 200°C. The insulating properties remain unchanged, but the compressive stress weakens. The softening temperature of stone wool products is over 1000°C.

Type-Examination (Module B) certificates No. EUFI29-22005587-MED and No. EUFI29-22003485-MED

Nominal Density

100 kg/m³

Package Type Plastic packs on pallet

DIMENSIONS	IONS		
THICKNESS	INNER DIAMETER	PIPE SECTION LENGTH	
20 - 100 mm	12 - 273 mm	1200 mm	
According to EN 13467	According to EN 13467	According to EN 13467	
Other Dimensions: Other dimensions available on request.
