PRODUCT DATASHEET

PAROC Pro Bend 100 AluCoat

Prefabricated insulation component made of stone wool with reinforced aluminium foil facing.

Thermal insulation of pipe elbows in industrial pipework.

Thermal insulation of pipe elbows in industrial pipework. Standard radius of other curve is 1,5 x outer diameter of pipe. Other dimensions available on request.

Surface temperature of the facing must not exceed 80°C (temperature restriction determined in accordance with heat resistance adhesive).

PAROC stone wool products are capable of withstanding high temperatures. The binder starts to evaporate when its temperature exceeds approximately 200°C. The insulating properties remain unchanged, but the compressive stress weakens. The softening temperature of stone wool products is over 1000°C.

Certification Number 0809-CPR-1016 Eurofins Expert Services Ltd, Kivimiehentie 4, FI-02150 Espoo. Finland

MED Type-Examination (Module B) certificates No. 74480/A0 and 74479/A0 and UK Type-Examination (Module B) certificates No. 74465/A0 and 74467/A0.

DURABILITY OF FIRE AND THERMAL PROPERTIES		
Durability of Reaction to Fire Against Ageing/Degradation	No change in reaction to fire properties for mineral wool products. The fire performance of mineral wool does not deteriorate with time. The Euroclass classification of the product is related to the organic content, which cannot increase with time.	
Durability of Reaction to Fire Against High Temperature	The fire performance of mineral wool does not deteriorate with high temperature. The Euroclass classification of the product is related to the organic content, which remains constant or decreases with high temperature.	
Durability of Thermal Resistance Against Ageing/Degradation	Thermal conductivity of mineral wool products does not change with time, experience has shown the fibre structure to be stable and the porosity contains no other gases than atmospheric air.	

Appearance

Facing Material	Aluminium foil reinforced with a glass fibre net.
