# INSULATION SOLUTIONS FOR PIPEWORK

PAROC's technical insulations offering consists of a wide range of prefabricated pipe sections for high-temperature industrial pipes. These products offer unparalleled benefits to both plant owners and managers, as well as industrial insulation contractors. One of the biggest advantages of PAROC pipe sections is quick and trouble-free installation which guarantees an effective thermal insulation.

Using stone wool pipe sections not only means significantly reduced costs from heat loss and long downtime periods, but also minimizing the risk of installation error, translating into extended longevity of the system.

## MULTI-LAYER PIPE SECTION INSULATION

Achieving thermal insulation properties as planned in the specification for high temperature industrial pipes is often impossible with only a single layer of insulation. For this kind of applications and requirements we create pipe section solutions for multi-layer section insulations.

When the systems are being heated to operating temperature, a thermal expansion of the pipes will take place. This can lead to serious heat and energy losses, if not considered from an insulation perspective. At elevated operating temperatures, a double layer insulation system is often required to mitigate for the potential opening of the joints.

## EFFICIENT AND FAST INSTALLATION

When the specification includes a double layer insulation, both PAROC pipe sections are handled as one, drastically cutting down installation work. Each package includes all of the products required for both the inner and outer layer, eliminating unnecessary waste.

The parts are precisely measured during the production stage to ensure compatibility and a good fit, while handling and pairing them is straightforward since they arrive fitted together, one inside the other. Thus, such a solution saves on work and costs, helps keep the site tidy and provides first-class insulation characteristics.

## PAROC® PRO LOCK

PAROC® Pro Lock 100 and 140 pipe sections (also available in a water-proof version WR) provide an interesting alternative for a double-layer insulation. Industrial pipelines are insulated efficiently – the thermal expansion of the pipe lines is handled by the Z-lock formation of the pipe sections' joints.

PAROC® Pro Lock Pipe Sections provide the benefit of a double layer insulation system, but in a single layer application – saving time and money. **This unique Paroc pipe insulation system can reduce heat losses by up to 25% and installation time by up to 30%.**

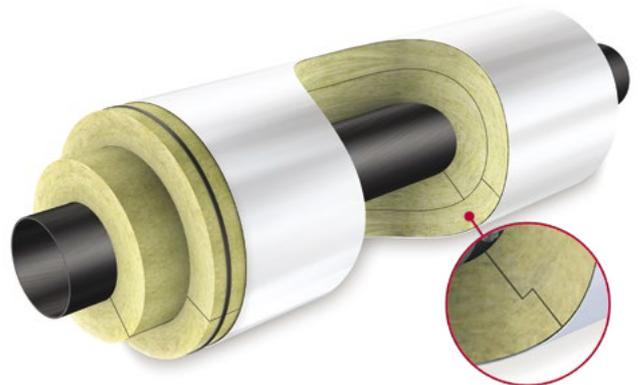

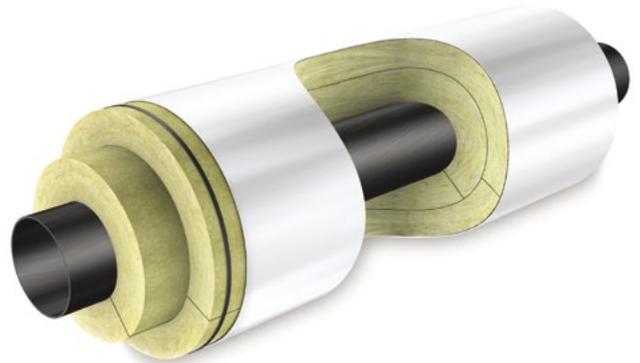

TABLE OF CONTENTS

## Standard double-layer solutions delivered as a single solution (PAROC® Pro Section DL products)

Total insulation thickness 100-300 mm

295	295-80+60-570	295-80		
305	305-70+70-583	305-80		
324	324-80+60-609	324-80		
356	356-90+50-635	356-60		
371	371-70+70-648	371-70		
406	406-60+80-687	406-60	Inner diameter	- Double-layer insulation thickness - Outer diameter
426	426-60+80-700	426-90		
457	457-50+90-739	457-80		
479	479-70+70-765	479-80

- PAROC® Pro Section DL1 (WR)\*

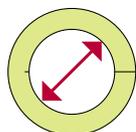

\* Inner section - density 140 kg/m<sup>3</sup>  
Outer section - density 100 kg/m<sup>3</sup>

PAROC pipe sections are customers to the construction site in two possible forms: as a single element with a hinge joint or as separate halves of a pipe section (F1) packed loosely on a pallet. No matter which option we choose, we can use dedicated Accessories for PAROC Technical Insulations: cutting knives for stone wool, tapes, rebar tie wires.

The primary order unit for PAROC products is pallet. Pipe sections are delivered on either short (one layer) or tall (double layer) pallets – depending on the quantity and dimensions of the products. PAROC products can be safely stored outside with the use of special pallet hoods available in PAROC's offer. One of the biggest advantages of this solution is its reusability – buy one pallet hood, use it for many years.

#### **Disclaimer**

The information relating to the products and systems contained in this communication ("Information") is accurate and reliable to the best of our knowledge as of its date issued and is subject to change without prior notice. No guarantee of accuracy is given or implied.

Since Paroc has no control over installation workmanship, accessory materials or conditions of application, no express or implied warranty of any kind, including those of merchantability or fitness for a particular purpose or course of performance or usage of trade, is made as to the performance of an installation containing Paroc products.

While the Information in this communication may relate to the technical application of certain Paroc products, it is in no event to be considered as technical advice on the basis of which Paroc may incur any liability.

User is solely responsible for determining whether a Paroc product is fit for a particular purpose and suitable for user's method of use or application.

Users of the provided Information assume full responsibility for all concept/design decisions made relating to the suitability of use.

Users must rely on their own judgment or that of a concept/design professional when determining how to best apply the data provided.

Users agree that Paroc is under no obligation to provide additional details, testing or test data on its behalf.

Liability of Paroc, if any, is strictly limited to replacement of product. In no event shall Paroc be liable for any other damages arising because of product failure, whether incidental, special, consequential or punitive, regardless of the theory of liability upon which any such damages are claimed.
